

Cheiron Web Site: To Do and Done

Last update: July 3, 2018

To Do:

- Need to add captions to remaining photo pages of past meetings (1995, 1993, 1992, 1990, 1989, 1988)
 - Make height of any portrait photo 400 pixels and upload to server
 - Copy caption making code into page header
 - Add captions to calls to a picture as per 1997 page
 - Upload the modified page and check appearance

Done:

July 3, 2018

- Added page and links to it for the 2019 call for book prize submissions

June 28, 2018

- Fixed bugs in links from images at bottom of home page (About, Membership) – thanks Kelli Vaughn-Johnson
- Added new splash images (based on new logo) to pages (About, Membership, Newsletter)

June 27, 2018

- Redirect from Akron site to new Alberta site is now in effect (thanks Cathy Faye!)
- Added 'Meetings' button to top part of the web pages
- Cleaned up website by moving several pages to Misc directory (about, membership etc) – now only index.html is in site's root directory
- Added new buttons and links to Misc directory to all of the web pages (hopefully)
- Added the final version of the small logo to all pages, and updated the big logo image on the Cheiron home page.

April 11, 2018

- Created new subdirectory structure for Book Prize pages
- Updated all links on buttons to go to new Book Prize index page

April 10, 2018

- Added links to conference website and conference program to home page and to some subpages (in Meetings subdirectory)

March 27, 2018

- Adjusted colour of crumbtrail text (grey now black)
- Adjusted colour of tables on executive subpages
- Adjusted colour of Google search bar

- Updated this document

March 9, 2018

- Adjusted position of footer images on remaining subpages
- Added captions to various slideshow images using suggestions from Chris Green

March 7, 2018

- Added new logo, along with changes to colour scheme, buttons, bottom images etc.
- Added slideshows for 2009 and 2010 meetings
- Figured out how to (mostly) center images in the footer when they are the only things present
- Cleaned up the current and past executive pages
- Advertised test drive of the site on the Cheiron forum
- Updated this document

February 13, 2018

- Added pdf (big files converted from jpg) of 1992 and 1994 programs to past program page

February 9, 2018

- Added pdf of 1969 program stuff to past program page

February 6, 2018

- Added new subdirectory for Young Scholar award, set up index page, page for current winner, and html pages for previous winners
- Fixed broken Young Scholar link on main page of website
- Changed a few settings in the FlexSlider css file to center pictures between arrows – pictures are still not centered on the screen, but this is slightly better
- Added a new container to .css for pictures (pic_container); use this as container for FlexSlider; result is that images are now centered on screen
- Updated this page

February 2, 2018

- Added pages for book prizes and for current book prize winner to fix links from home page
- Removed book prize info from young scholar page to clean that up
- Fixed a few incorrect breadcrumbs on pages related to meetings
- Updated this document

January 31, 2018

- Put sensible bread crumbs on each html page
- Fixed one page with errors on top buttons

- Checked buttons on *most* pages along with bread crumbs – everything seems to be working
- Updated this document

January 25, 2018

- Placed a working search bar on the bottom of each of the subdirectory html pages
- Removed the search bar, and fixed the image link, at the top of each subdirectory html page
- Added a header to each html page to let viewer know that there is a search bar at the bottom (for users with smaller screen who may not see it at first glance on the home page for instance)
- Updated this page and added it to the website

January 23, 2018

- Removed the search stuff from the top bar of each of the main pages (still some subpages remain where this needs to be done)
- Placed a working search bar on the bottom of each of the main pages (note – old search bar on Akron site does not work)
- Moved the title up to the blue bar on each of the main pages (still some of this to do for subpages)
- Updated this page and added it to the website

January 17, 2018

- Added example Twitter list to home page of mirror site

December 21, 2017

- Fixed call to missing pictures on 2014 meeting slideshow

December 15, 2017

- Added images and slideshow with some captions for 2014 meeting
- Added link to this to Akron site

December 12, 2017

- Updated links on links page on the mirror site to match the new links that were added to the Akron site
- Added more captions to 1996 photos page
- Added captions to 1995 photos page
- Added photo page for 2017
- Added photo page for 2016
- Corrected links on past programs page
- Added a link to the pdf of this document on the contacts page
- Added captions to 1993 photos page
- Added links to Alberta slideshows on Akron past meetings photos page

December 11, 2017

- Solved display problem with portrait pictures (too much height) by modifying maximum size setting in flexslider.css
- Added captions to several slides, changed appearance to show black text only on white background of slide by making caption background white in caption definition code in header

December 8, 2017

- Found some code to add a caption to an image, and put in header of any page that uses flexslider and provides captions
- Simple code to add a caption is provided immediately after call to picture in flexslider content
- Issue: Captions don't look great because of background color. Captions also do not appear for portrait images. Need to fiddle with image size options, caption options, and related stuff to see if images can be presented nicely with attractive captions

December 7, 2017

- Try to get Flexslider to work on mirror site to display photos of past meetings
- Issue: Will work with old jQuery library, but not new one
- Solution: The code to open a window described on Flexslider website is no longer supported by jQuery. Slight change to one line of code uses new window opening function call and works with new library
- Issue: Portrait slides are too big – height causes image to drift over footer images, and forces user to scroll down
- Plan: Must be able to change some settings in flexslider.css to put limits on size of image containers. Will have to fiddle with settings, because there is not a lot of documentation!

November 23, 2017

- Have created html pages for main Akron pages (the ones linked to by buttons at top of any page) on bcp mirror site
- Have successfully linked mirror pages to mirrored css files
- Issue: Just need to go through each page and get links to other pages on site working by building new subpages
- Plan: Take this opportunity to hierarchically organize content files (images, documents) to make them easier to find

November 20, 2017

- Have received zipped file of all Akron content (images, some documents, css files); this content does not include html files which are apparently generated automatically from their content-manipulation system
- Issue: Missing html code for site pages

- Plan: View source code of Akron pages, save locally, import into Dreamweaver, and edit

November 15, 2017

- Get access to Akron website editor and make minor edits
- Issue: even with access to website editing, I do not have permission or access to header or footer for editing
- Plan: Build a mirror web site on BCP to see what can be accomplished
